

## PRE-LICENSURE BSN CURRICULUM

The undergraduate Bachelor of Science in Nursing program is a traditional four-year program with eight academic semesters. The full-time program of study incorporates the exploration courses of Anna Maria College with nursing curriculum, totaling 121 credits.

- *All courses, e.g., general education, science courses, must be successfully completed in sequence to continue in the nursing program as stated in the college handbook and nursing student handbook. A withdrawal or repeated science and/or nursing course within the PLBSN curriculum plan is considered a separation from the nursing program. Students must complete the PL-BSN program within seven (7) academic semesters after entering the nursing program course sequence as offered (NUS 211 and NUS 212) for the first time. Students granted course exemptions will be required to complete the total number of program credits for the degree.*
